

ADR 008 - Delete not (anymore) used Resources

Status	PROPOSED
Date	Jan 14, 2026
Deciders	@Konrad Heidrich , @Thomas Weinschenk , @David Weiss , @Blumenstock, Werner (DI FA DSP SEN TRS)
Consulted	
Informed	

Context and Problem Statement

With upcoming V2 we eliminated some Resources and even one Event. We also have several not used Resources. We should take the chance and clean up the document.

Decision Drivers

- Complexity of the OEC-GL.
- Complexity of the compliance tests.

Considered Options

- Delete Event class NE107 ([_ToDelete_9.3.9.3 NAMUR NE107](#))
- Delete Resources [_ToDelete_9.3.4 License](#) , [_ToDelete_9.3.5 LicenseText](#) [_ToDelete_9.3.6 RtLicense](#) , [_ToDelete_9.3.13 Interfaces](#) , [_ToDelete_9.3.15 Software Bill of Materials \(SBoM\)](#)

Decision Outcome/ Chosen Option

Just do it. It is a consequence out of the other RFCs.

Consequences/ Pros and Cons

- ➖ Not backward compatible to OEC-GL v1.1.x. Not only but also because Part 14 V1.05.x is not backward compatible to v1.04.x
- ➖ Existing OEC solutions are not able to get a new compliance batch, based on v2.x of the OEC-GL, without changes.

- ➖ Restructuring/renumbering of GL is necessary.
- ➕ Complexity for integrators and compliance tests are less.
